PROFESSIONAL RECORD

# Rafiul Bari

**Cybersecurity · IT audit & technology risk · Identity & access management**

Brooklyn, NY  rafiulbari70@gmail.com  linkedin.com/in/rafiul-bari  github.com/blurxy

Cybersecurity B.S. candidate and full-time Operations & Systems Associate owning configuration, access administration, and change documentation across four production platforms. Targeting IT audit, technology risk, GRC, and IAM roles.

## EXPERIENCE

### Plant Powered Metro New York

Jul 2025 – Present

**Operations & Systems Associate**

Promoted from Operations Assistant, July 2026.

- Drafted staff policy requiring 2FA and semiannual access review; reconciled 48 Slack and 39 Asana accounts via live APIs to flag deprovisioning; audited link sharing on ~7,000 shared-drive files.
- Shipped tiered operations ticketing with director approval, scope-confirmation gates, and a full audit trail; 74 requests tracked, 69 resolved.
- Migrated 379 attendance + 176 testimonial records with email present on only 20%; escalated ambiguous matches and preserved source tables for rollback.
- Built a self-hosted signed-link service: expiring per-record tokens let approximately 130 constituents update their data without third-party processing.
- Administer NeonCRM, Asana, and Google Workspace and build in Airtable: 54 documented live automations (47 Asana rules, 7 n8n workflows) and a change log for every update.

### Bari & Sons Construction Inc.

Feb 2018 – Present

**Vice President**

- Drafted customer contracts for 47 jobs since 2022; scope, select, and oversee vendors and subcontractors and review permits for regulatory compliance.

### Bari & Sons Construction Inc.

Jan 2018 – Feb 2020

**IT Help Desk Support**

- Administered Active Directory users, groups, and password resets, and removed stale accounts to close unused access.
- Triaged Windows/macOS malware, applied patches and baseline hardening, and wrote prevention knowledge-base articles.

## TECHNICAL PROJECT

### Automated Futures Trading System

Independent · Python · PostgreSQL/pgvector · Local LLMs

- Built a kill switch, loss/drawdown circuit breakers, and a preflight gate that halts trading when any dependency is degraded.
- Enforce the trading rulebook—contract caps, consistency limits, daily loss limits—as hard clamps at order construction.
- Apply purged and walk-forward cross-validation, transaction-cost floors, overfitting thresholds, and drift monitoring with retrain triggers.

## CERTIFICATIONS

| | |
|---|---|
| Google Cybersecurity | 2025 |
| CodePath Intermediate Cybersecurity | 2025 |
| TEEX Network Assurance and Information Security Basics | 2024 |
| Cisco Packet Tracer | 2024 |

## EDUCATION

### B.S. in Cybersecurity

New York City College of Technology (CUNY)

**Expected December 2026**

Network Security; Cryptography and Access Control; Systems Administration; HIPAA/PCI-DSS.

## SKILLS

**GRC & IAM**

HIPAA, PCI-DSS; access reviews and recertification; least privilege; provisioning and deprovisioning; MFA; permission auditing; role mapping; change management; approval gates; SOPs; audit trails.

**Security operations**

Log review; incident intake/escalation; malware triage; SIEM; root-cause documentation; endpoint hardening; patch management.

**Systems & tools**

Active Directory; Windows, macOS, Linux; TCP/IP, DNS, DHCP, VLANs, VPNs, firewalls, IDS/IPS; Wireshark, Nmap; Python, Bash, PowerShell.

**Platforms & practice**

NeonCRM, Asana, Airtable, Google Workspace, Slack; stakeholder communication; vendor/third-party risk review; technical documentation; staff training.
