PROFESSIONAL RECORD

Rafiul Bari

Security engineering · Detection & automation · Identity & access

Brooklyn, NY rafiulbari70@gmail.com linkedin.com/in/rafiul-bari github.com/blurxy

Cybersecurity B.S. candidate (December 2026) administering nonprofit access and evaluating security controls through IDS lab experiments, sandbox tests, and Python tooling.

EXPERIENCE

Plant Powered Metro New York

Jul 2025 – Present

Operations & Systems Associate

Promoted from Operations Assistant, July 2026.

- Administer Slack, Asana, and Google Workspace; reconciled 48 Slack and 39 Asana accounts via APIs and audited sharing on ~7,000 files. Drafted 2FA and semiannual access-review policy.
- Built tiered request intake with approval gates and a change audit trail; 74 requests tracked, 69 resolved. Staff rollout pending.
- Built a volunteer self-update portal with expiring per-record tokens; generated 53 personal links, not yet sent.
- Migrated 555 records into Airtable with email on only 20%; escalated ambiguous identity matches and preserved source tables for rollback. Maintain 54 live automations.

Bari & Sons Construction Inc.

Feb 2018 – Present

Vice President

- Drafted contracts for 47 jobs since 2022; built a Python service that turns job texts into drafts for a human to review and send.

Bari & Sons Construction Inc.

Jan 2018 – Feb 2020

IT Help Desk Support

- Administered Active Directory users, groups, and password resets, removed stale accounts, and triaged Windows/macOS malware.

SECURITY PROJECTS

Suricata IDS evaluation · Three-person capstone lead, Fall 2026

- Wrote 14 rules and froze them before scoring. Adding 12 web rules to stock raised held-out detections from 6/37 to 33/37, with 0/20 benign samples flagged. Verified rule loading and ran a positive-control scan.

Haunted Inbox · Hacktoberfest Hack Day, Oct 2026

- Three-person team: hidden-text injection leaked a patient record in 3/3 unguarded runs, 0/3 guarded (temperature 0, fixed seed); code controls access, the model only classifies.

Security tools · github.com/blurxy

- aur-build-diff: traced DNS escaping my initial bubblewrap sandbox through a resolver socket; blocked it with separate fetch/build jails on one host.
- beacon-spectrum: built pcap/Zeek log ingest and a periodicity research prototype; 19.4% false alarms vs 98.0% for my reimplemented baseline on synthetic data.
- py-exec-mcp: PyPI package; GitHub Actions CI on 3 OSes × 3 Python versions.

Automated futures trading system · Independent

- Contributed a delayed-fill race fix so bracket setup waits for order status; added 2 tests. Merged upstream in project-x-py PR #179 and released in v4.4.2.

CERTIFICATIONS & TRAINING

Cisco Network Defense (course complete)	2026
Google Cybersecurity	2025
Google IT Support	2025
CodePath Intermediate Cybersecurity	2025
TEEX Network Assurance and Information Security Basics	2024
Cisco Packet Tracer	2024

EDUCATION

B.S. in Cybersecurity

New York City College of Technology (CUNY)

Expected December 2026 · Major GPA 3.14

Penetration Testing (in progress); Network Security; Computer Forensics; Cloud Security; Cryptography; Windows/Linux System Administration.

SKILLS

Detection · capstone & projects

Suricata rules and held-out evaluation; pcap and Zeek conn.log parsing (beacon-spectrum).

Engineering · shipped tools

Python (contract service, PyPI package); bubblewrap/strace (build sandbox); GitHub Actions (test matrix).

Identity & access · employment

Active Directory users/groups; Slack, Asana, Google Workspace administration; API account reconciliation.

Network testing · coursework

Nmap scans and NSE scripts (Lua); Nessus scans of Windows lab targets; Bash port scanner.
