PROFESSIONAL RECORD

Rafiul Bari

Security engineering · Detection & automation · Identity & access

Brooklyn, NY rafiulbari70@gmail.com linkedin.com/in/rafiul-bari github.com/blurxy

Cybersecurity B.S. candidate (December 2026) who builds and tests security tooling (IDS rules, build sandboxes, prompt-injection defenses) and runs identity and access for a nonprofit's production systems.

EXPERIENCE

Plant Powered Metro New York

Jul 2025 – Present

Operations & Systems Associate

Promoted from Operations Assistant, July 2026.

- Run access for Slack, Asana, and Google Workspace: drafted the 2FA and semiannual access-review policy, reconciled 48 Slack + 39 Asana accounts via APIs, audited link sharing on ~7,000 files.
- Designed tiered ticketing with approval gates and an audit trail: 74 requests tracked, 69 resolved; staff rollout pending.
- Built a signed-link self-update portal (expiring per-record tokens, 1,473 automated checks); links generated for 53 volunteers ahead of launch.
- Migrated 555 records (email on 20%) into a 21-table Airtable base, now 165 people and 511 attendances; maintain 54 live automations.

Bari & Sons Construction Inc.

Feb 2018 – Present

Vice President

- Drafted customer contracts for 47 jobs since 2022, then built a pipeline that turns job texts into contract drafts with a human approval step.

Bari & Sons Construction Inc.

Jan 2018 – Feb 2020

IT Help Desk Support

- Administered Active Directory users, groups, and password resets, removed stale accounts, and triaged Windows/macOS malware.

SECURITY PROJECTS

IDS rule evaluation (Suricata) · Capstone lead, Fall 2026

- 2 tuned rules raised 195 alerts on a connect-scan capture where the stock ruleset (52,667 signatures loaded) raised 0; on a held-out set, detection rose from 6/37 to 33/37 with 0/20 false positives.

Haunted Inbox · Hacktoberfest Hack Day, Oct 2026

- Three-person team; at temperature 0 and a fixed seed, a hidden-text injection leaked a patient record in 3/3 unguarded runs, 0/3 guarded; 1,262 tests.

Security tools · github.com/blurxy

- aur-build-diff: bubblewrap/strace build sandbox; blocked DNS that escaped naive network isolation.
- beacon-spectrum: periodicity research prototype; 19.4% vs 98.0% false alarms vs a reimplemented baseline (synthetic).
- py-exec-mcp: PyPI package with CI on 3 OSes × 3 Python versions and CodeQL.

Automated futures trading system · Independent

- Python, PostgreSQL/pgvector, local LLMs: kill switch, loss breakers, dependency gate, rulebook clamps; upstream fix merged into the project-x-py SDK (PR #179, released v4.4.2).

CERTIFICATIONS

Cisco Network Defense	2026
Google Cybersecurity	2025
Google IT Support	2025
CodePath Intermediate Cybersecurity	2025
TEEX Network Assurance and Information Security Basics	2024

EDUCATION

B.S. in Cybersecurity

New York City College of Technology (CUNY)

Expected December 2026 · Major GPA 3.14

Penetration Testing; Computer Forensics; Cloud Security; Cryptography; Network Security; Windows/Linux Sys Admin.

SKILLS

Detection & analysis

Suricata rule writing and tuning; Wireshark/tshark; pcap and Zeek analysis; Nmap and NSE (Lua); Nessus; false-positive testing with held-out sets.

Security engineering

Python; Bash; sandboxing (bubblewrap, strace); prompt-injection defense; CI, CodeQL, Dependabot; Playwright; fail-closed controls.

Identity & access

Active Directory; Google Workspace, Slack, and Asana admin; 2FA policy; access reviews; deprovisioning; audit trails; least privilege.

Platforms

Linux, Windows, macOS; PostgreSQL; Cloudflare Workers; Airtable; NeonCRM; VirtualBox labs.
